

OBERON 2.1

Evolution of perfect design

Simple, pure, sovereign. Oberon 2.0 is now also available for the corner. The Oberon 2.1 back-to-wall bathtub now comes as a monolith, with a completely seamless rim. Same design language, even more filigree design. The corner version complements the existing Oberon 2.0 with new features and even more precise design. As a back-to-wall bathtub in BiColour look, they become a special eye-catcher.

The Highlights of Oberon 2.1

- + Monolith tub made of Quaryl®, completely seamless
- + Characterized by a curved oval side
- + Available as a duo variant 180x80, corner right and corner left
- + Pre-wall installation ideal when there is no space for freestanding bathtub
- + Space saving inside due to reduced edges
- + Interior depth of 48 cm for maximum bathing comfort
- + Tub rim fitting can be positioned on either side for more design options.
- + Drain and overflow fitting with push-to-open valve available in four colors and included in the scope of delivery
- + Optionally available with integrated tub spout and whirlpool system

Colour accents

- + Back-to-wall bathtub available as Colour on Demand and in all Artis colors.
- + Drain and overflow fitting can be retrofitted or replaced to add new color accents to the back-to-wall bath.
