

ProActive+

Non-contact flushing for added hygiene and sustainability

The next generation of flush plates is now available for the tried and tested ViConnect installation systems and WCs from Villeroy & Boch - sensor-controlled and featuring intelligent additional functions. ProActive+ sets new benchmarks in hygiene and economy.

Technical advantages

- + Automatic flushing and control of the appropriate flushing volume by means of two-zone sensing fields and duration length
- + 3 flush volumes: pre-flush, small and large flushing volume
- + Pre-flush for reduced soiling and easier cleaning
- + Alternatively, manual flushing is possible - in non-contact mode by means of gestures or at the push of a button for inexperienced users
- + Integrated hygiene flush mode to reduce germs
- + Pro app can be used to adjust the main flushing volume, to activate pre-flush and hygiene flush and to adjust intervals
- + Adjustment of light intensity and color temperature possible via Pro app

ProActive+ flush plates from Villeroy & Boch

- + In white glass finish (200G)
- + In brushed stainless steel finish (200M)

Renowned Villeroy & Boch quality

- + For combination with Villeroy & Boch toilets - adjustment via pre-setting by Pro app
- + „Made in Germany“
