

# The new ViCare washbasins

## Design knows no barriers

The new ViCare washbasins bring functionality, hygiene and design into perfect harmony. Integrated ceramic handles foster users' independence, while their rounded edges and accessible living concept increase safety. The washbasins are the latest addition to the holistic ViCare Collection and are suitable not only for multi-generational and nursing-care facilities, but also for private homes.

### Designed for accessible living

- + Ceramic handles with rounded edges are integrated into the sides to make it easier for users to support themselves and pull themselves up. These also offer secure support when standing and can be used as towel holders if desired
- + A recessed grip on the underside at the front further eases the burden of pulling up a wheelchair and - coupled with side handles - facilitates manoeuvring the wheelchair
- + Deep, functional basin with spacious shelf
- + In compliance with DIN 18040 and therefore ideally suited to accessible living
- + Excellent wheelchair accessibility and plenty of knee clearance permit personal grooming while seated

### Design

- + Attractive and practical design
- + Available in the sizes 60 cm and 80 cm
- + The washbasin's universal design means that it can be integrated into private homes early on in preparation for growing older

### Hygiene

- + Can be cleaned quickly and easily thanks to a hygienic raised-edge wall connection (which protects silicone joints) and rounded edges
- + Also available without tap hole/overflow to comply with the most exacting hygiene standards in hospitals and healthcare facilities
- + Optionally available with the CeramicPlus dirt-repellent finish and the AntiBac anti-bacterial glaze
