

# VICONNECT

## The clever connection

The ViConnect installation systems from Villeroy & Boch are now even easier to use. If necessary you can readjust the flush flow directly via the inspection opening in the toilet's cistern. With a selection of timeless flush plates available, ViConnect offers a one-stop complete bathroom solution for every building situation.

### Installation systems from Villeroy & Boch

- + Wide range of designer flush plates to match the Villeroy & Boch furniture finishes
- + Installation systems for toilets, bidets, urinals and washbasins

### Technical advantages

- + Adjustable flush flow control: Readjustment without the need for special tools or the removal of components
- + Integrated vertical struts for safe installation of all wall-mounted toilets (with SupraFix 3.0)
- + Rapid and intuitive installation of the flush plate, both from the front or from above, thanks to an innovative cable technology
- + Adjustable, self-locking feet permit easy installation

### Renowned Villeroy & Boch quality

- + Safest choice for combination with Villeroy & Boch ceramics thanks to regular product testing and optimised interfaces
- + All products made in Germany
- + Extended guarantee
- + 25-year availability guarantee for replacement parts

### Product portfolio

- + Numerous models for all the usual bathroom applications: standard, compact, accessible, corner installation etc.
- + Dry-wall and brick-wall elements for all manner of buildings
- + Flush plates in various designs, materials and colours for every price range
