

ARCHITECTURA METALRIM

Ultra-flat design, extra-high stability

Innovative MetalRim technology is used in the new generation of shower trays: it is a galvanised steel reinforcement that is integrated in all four edge areas and that ensures maximum material stability. The shower trays also allow ultimate flexibility thanks to 3 installation options.

Proven material quality

- + High-quality sanitary acrylic with a 10-year guarantee, tested in acc. with standard EN 249
- + Maximum robustness tested up to 1000 kg
- + Non-porous, sealed surface for easy-cleaning and high gloss and therefore particularly hygienic
- + UV-resistant surface that can be repaired

Minimalist design

- + Ultra-flat, rimless look
- + Flush-integrated water outlet cover

Maximum safety

- + VilboGrip anti-slip finish, class C, available as an option
- + Level entry possible

Easy and safe installation

- + 3 installation variants for maximum flexibility: flush-fit installation, installation on tiles, installation on a base
- + Easy standard assembly
- + Installation set available
- + MEPA Aquaproof sealing sets for corner and flush-fit installation of shower trays (48 mm) available

Wide choice of models and colours

- + 31 models x 2 rim heights (15 mm and 48 mm) x 2 finishes = 124 possibilities
- + 7 colours: 01, 96, 1S, 2S, 3S, 4S, RW
- + Outlet cover available in matching colours including matt
