

OBERON 2.0

The evolution of perfect design

Simple, pure, confident. With its incomparable sense of lightness, Oberon 2.0 takes the characteristic style of our classic Oberon design and raises it to a new level. An edge that's just 10 mm thin, even more precise radii and the flush-mounted overflow bring fascinating clarity to the new Quarryl® baths. The back-to-wall baths in a BiColour look are especially eye-catching.

The highlights of Oberon 2.0

- + Logical continuation of the Oberon design
- + Available as a built-in bath (180 x 80 cm and 170 x 75 cm) and back-to-wall model (180 x 80 cm)
- + Installation in a frame system is ideal if there's not enough room for a free-standing bath
- + The Quarryl® material permits an amazingly thin bath rim of just 10 mm
- + More spacious interior thanks to reduced edges
- + Inside depth of 47 cm for maximum bathing enjoyment
- + Rim-mounted tap fittings possible for both the built-in and back-to-wall baths
- + Outlet and overflow fittings with Push-to-Open valve in Chrome or White included
- + Optionally available with integrated water inlet and whirlpool system

Colour highlights

- + Back-to-wall baths available in BiColour look, in the colours from Gesa Hansen's colour concept
- + Also available in many standard colour systems, such as PANTONE, Sikkens etc. (except metallic colours)
