# EASY-BOX

Genius behind the wall

The installation-friendly assembly system is compatible with all built-in mixer taps from the *Villeroy & Boch* and *Ideal Standard* brands.

Villeroy & Boch  
and Ideal Standard  
Compatible Technology

# THE SMART SOLUTION FOR EVERY INSTALLATION SITUATION

The Easy-Box has been designed to make installations as simple and versatile as possible. It offers effortless assembly, absolute compatibility and maximum flexibility in the choice of tap. The universal design allows easy integration of all *Villeroy & Boch* and *Ideal Standard* built-in taps.

## ADVANTAGES AT A GLANCE:

- Modular & flexible - one system for different types of taps
- Quick & easy assembly - supported by Fast-Fix technology
- Safe & reliable - clever features for perfect installation

# ASSEMBLY MADE EASY

Sophisticated technology for maximum flexibility, quick assembly and the highest possible safety: an adaptable base set, the innovative Fast-Fix technology and standard-compliant sealing make the Easy-Box the perfect built-in solution for every installation situation.

## FLEXIBLE:

- A universal base set for all bath and shower taps with ceramic or thermostatic cartridges
- Space-saving & efficient - Reduced storage costs thanks to a universal solution
- Easy adaptation - Taps can be replaced without additional effort and expense

## INSTALLATION-FRIENDLY:

- Quick installation with Fast-Fix - Saves time, reduces errors, optimises workflows
- Precise assembly - Markings & orientation aids assist with installation
- Flexible depth adjustment - Adjustable mounting feet, accessory for extension

Projecting pipe connections allow easy assembly.

## SAFE:

- Reliable sealing - Protects brickwork & prevents damage
- Standardised safety - with the fitting rinsing in accordance with DIN 1988, drinking water protection according to DIN EN 1717, and noise protection (sound class I) according to DIN 4109 is enabled

Internal and external sealing - The sealing fleece provides a wall seal under the tiles.

# FAST-FIX: THE CLEVER INSTALLATION SOLUTION

All of our products are designed to make everyday life easier for our customers. We have therefore developed the Fast-Fix assembly system - an innovative solution for simple, flexible and smooth installation. Whether in, on or in front of the wall - the Easy-Box adapts perfectly to every installation situation.

## SIX INSTALLATION OPTIONS:

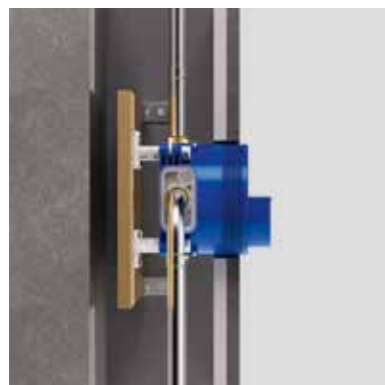

Installation in the wall

Installation on the wall

Installation in front of the wall with mounting feet

Installation on a pre-carrier system

Installation on prefabricated cells or assembly cells

Installation in studding (brackets purchased separately)

# PERFECTION IN EVERY COMPONENT

## FIXATION HOLES

The cleverly placed holes allow easier assembly in all installation situations

## BRASS CROSS

Cross-shaped brass insert with water circuit to accommodate the functional unit

## CABLE INLET

for electronic versions

## 1/2" PIPE CONNECTIONS

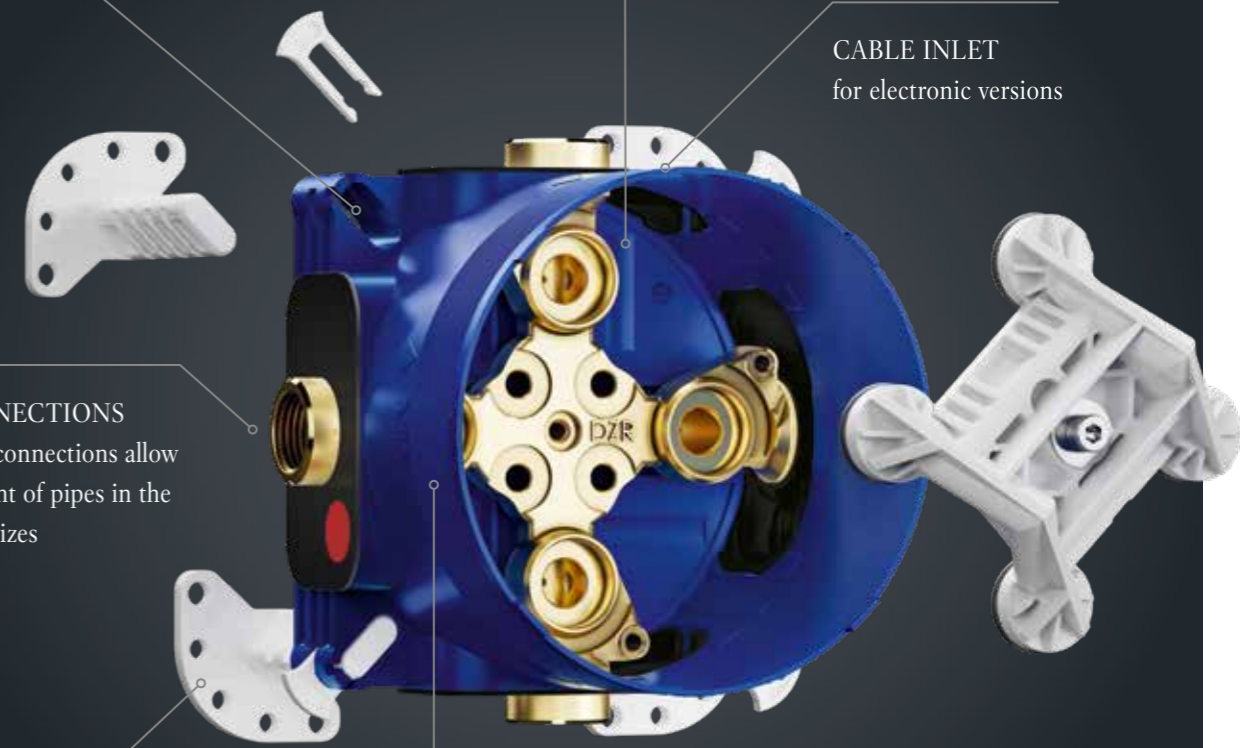

The projecting connections allow easier attachment of pipes in the most common sizes

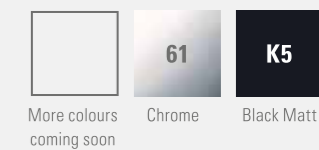

## GROOVES

The pre-imprinted grooves make it easier to trim the projecting collar

## FIXATION FEET

The fixation feet supplied allow easy attachment and progressive adjustment of depth (up to 22 mm variability in the body plus 35 mm with the feet)
