

SUPRAFIX 3.0

Easy installation. Invisible mounting system.

The new SupraFix 3.0 generation (patent pending) makes the installation of wall-mounted toilets even more flexible. It allows toilets to be installed quickly and easily by just one person - conveniently from above and with no visible attachments. New: toilet seats can now be positioned flexibly according to the customer's preference.

Easy handling

- + Simple installation of toilets from above
- + Toilet stays securely in place as soon as the attachment screws have been screwed into the holes in the toilet seat
- + Can be installed by just one person
- + Easy levelling of uneven areas on walls of up to 17 mm with the included Vego-Pieces

Quick and flexible installation

- + 2-in-1 installation of toilet and toilet seat using just one attachment and the same assembly holes
- + More flexible installation and precise positioning of the toilet seat thanks to the Vario-nut

Perfect toilet design

- + Concealed attachment: no visible screws or covers
- + Allows both uniformly smooth toilet surfaces and alignment of the toilet and toilet seat
- + Different designs of toilet seats available with QuickRelease and SoftClosing
