

TwistFlush

Efficiently designed to perfectly clean

TwistFlush is the new advanced toilet flushing system, which ensures optimum flushing performance on every use while being extremely water-efficient. Using the physical force of a water vortex, it cleans hygienically and thoroughly.

Functions and features

+ Powerful swirling water

The inner geometry of the Villeroy & Boch TwistFlush WC allows for a highly efficient water flow design and clearly surpasses the standard requirements*. Using vortex power, TwistFlush eliminates stains and reduces the need for a brush. Effortless hygiene, maximum efficiency.

+ Save up to 19,700 litres of water a year

The toilet only uses 4,5 litres for a big flush und 3 litres for a little flush. Thanks to the powerful flush you usually only need to flush once. This means that a family can save up to 19,700** litres a year.

+ Tough on dirt and germs

The rimless bowl and CeramicPlus facilitate cleaning while AntiBac prevents 99,9 % of bacteria growth.

The water swirls over almost the entire inner surface area, with no splashing*. There is a proven reduction in the generation of aerosols, which helps to prevent the spread of germs and pathogens.

Range

+ Multiple design options

TwistFlush is integrated into Antao, Subway 3.0, Universo, Skyla, Architectura and O.novo, offering powerful, hygienic flushing across all styles and price points.

* Requirements in accordance with European Standard EN997.

**4-person household, compared with a conventional 6-litre flush. Average use: 5 x per person per day, based on information from the German Federal Environmental Agency
