

A New Class Of Hot Tub

Hot tubs from Villeroy & Boch

*Unique design, technology
and energy efficiency:*
Hot tubs from Villeroy & Boch

The market demands individuality:

And we have made it a matter of principle

These hot tubs give you the freedom of combining your preferred jets with your favourite seat. You can choose between 18 different JetPaks and position them at every seat in no time at all – for a wellness experience that is exactly tailored to your respective needs. Thanks to this patented JetPak technology, hot tubs can be upgraded at any time to include the JetPaks with the latest jet technologies. Which other hot tubs can be so easily adapted to meet the individual wellness needs and preferences of their users?

Market standard

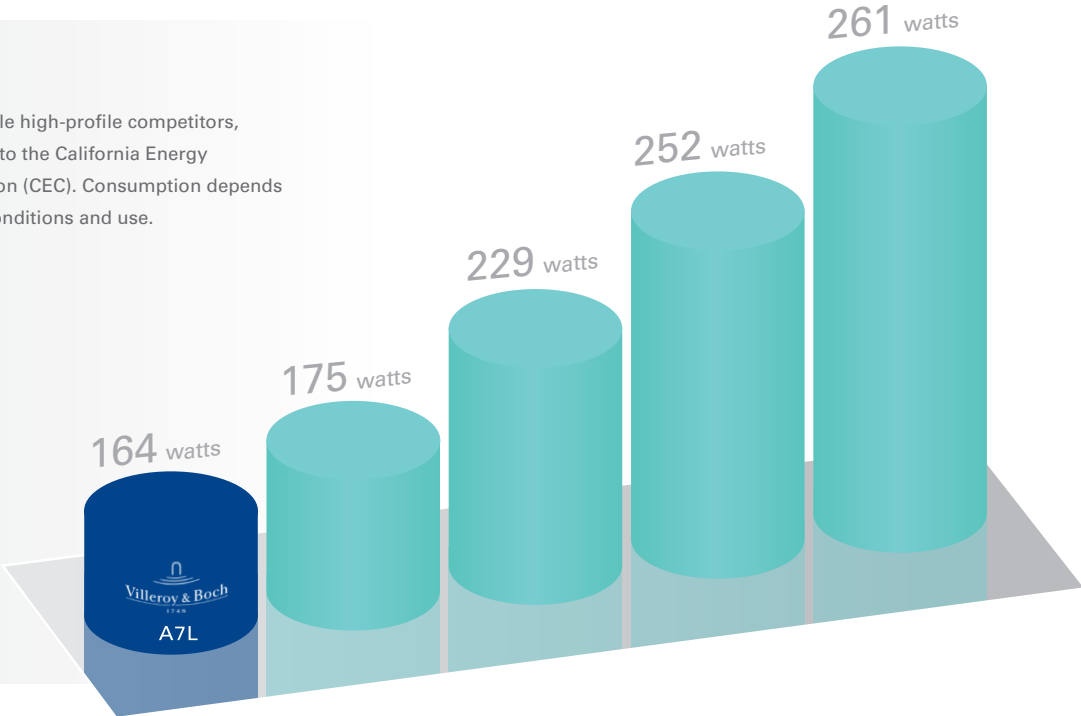

Villeroy & Boch technology

*The competition is
holding on to outdated solutions:*
We are creating something new

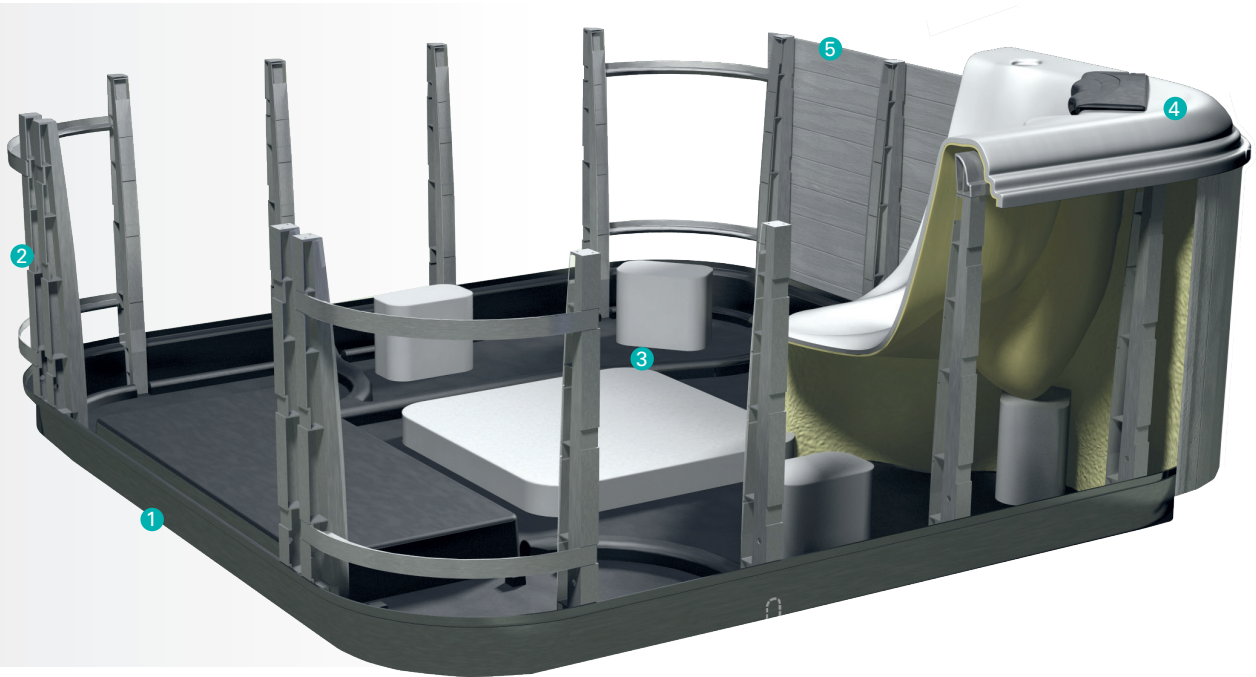

Whilst seemingly endless pipes are the norm in standard hot tubs, we have developed a new, intelligent solution: the ingenious JetPak technology. It requires up to 90% less plumbing, minimises the risk of leaks and is much safer and more energy-efficient than the systems of other suppliers.

Comparable high-profile competitors, according to the California Energy Commission (CEC). Consumption depends on local conditions and use.

Global climate protection calls for energy efficiency:
Our hot tubs are amongst the most economical in the world

Energy is valuable and shouldn't be wasted, which is why these hot tubs are designed for both the economical and efficient use of resources. On the one hand, this is thanks to the full-foam insulation and, on the other hand, an up to 90% reduction in the amount of plumbing. Most of the pipes run through water – so the warm water in the tub prevents them from cooling down. In addition, the energy-saving cover prevents the loss of heat, not only on cold winter days.

Demand for robust designs is increasing:

Our engineers have responded with five solutions

Exclusive EnduraFrame™ design. A unique support structure ensures the above-average load-bearing capacity and durability of the Villeroy & Boch hot tubs:

EnduraBase™ - the closed ABS floor delivers noticeably quieter operation and a reduction in vibrations ❶

EnduraBeam™ - the integral frame construction ensures above-average strength and durability ❷

EnduraSupports™ - for increased stability and structure of the foot room and sitting areas ❸

EnduraShell™ - the acrylic surface is reinforced with polyurethane foam for enhanced hygiene and a lasting shine ❹

EnduraWood™ - weather- and UV-resistant plastic outer construction ❺

The Ultimate Hot Tub: Hot tubs from the Villeroy & Boch ULTIMATE LINE

The outstanding design and sophisticated cutting-edge technology of the Ultimate Line models ensure maximum comfort. The elaborate interior design with extremely comfortable seats and adjustable headrests allows for an innovative sitting/reclining concept with up to three different reclining positions for different user heights. The intelligent touch screen control system – and up to three more control pads – easily manages all massage jets, the lighting, sound system and waterfall. Perfectly shaped, high-quality materials in premium colours give the high-end models the final touch: awarded the Red Dot Award 2020.

Outstanding design: The DESIGN LINE hot tubs

Puristic, understated, almost futuristic - we have created a real highlight with the innovative concept for our Just Silence and Just Silence Compact hot tubs. The elegant design with its clear lines and cubist form was recognised by the experts of the iF Design Award 2015 and the Red Dot Award 2016 for our Just Silence model. Dipped in pure white, these hot tubs take modernity to a whole new level.

Unique reclining concept:

Just Silence provides an even greater feel-good experience

The unique, reduced form and the straight-lined design pave the way for an innovative sitting and reclining concept that offers more space for comfort, and is ideal for relaxation and conversation.

Up to five people can sit in the tub across from each other at an angle – a position that allows sufficient leg room.

Custom-made luxury:
The PREMIUM LINE

Individual colour scheme, a wide range of models and optimum ergonomics: our Premium Line hot tubs can be customised to your wishes and needs. They provide an ideal platform for making a colour statement and offer a large choice of colours for the inner and outer shell, as well as various JetPaks.

A Premium spa also includes premium equipment - which is why our hot tubs have stylish stainless steel jets, interior and exterior lighting and an illuminated waterfall, as well as a variety of jets inside for feet, legs and hips.

Maximum comfort and an individual colour scheme:
The COMFORT LINE.

If you feel like a little self-indulgence, you'll love our Comfort Line: luxurious features meet moderate prices. Each of our models has modern JetPak technology and sets the same high standards as our premium hot tubs. Configure your own hot tub to strike the perfect balance between your needs and your pocket.

Consumers trust big brands:
Benefit from our good name

Villeroy & Boch, founded in 1748, has always understood, as only the greats can do, how important it is to move with the times. The brand derives its strength from the way in which it combines tradition and innovation. These values are an integral part of the hot tubs that Villeroy & Boch has been distributing to more than 40 countries since 2005. Enjoy the confidence in a reliable brand and the assurance that comes from having the service and qualities of a strong partner at your side for many years to come.
