

TITANCERAM

Ceramics from master craftsmen

Villeroy & Boch combines natural raw materials such as feldspar, quartz, clay and titanium dioxide to create an innovative material that combines the properties of high-quality ceramics with exceptional strength: TitanCeram. This enables impressively delicate forms with sharply defined edges that are very stable and robust at the same time.

Innovative ceramic material

- + The innovative material TitanCeram permits very precise, delicate designs
- + Great material and product stability thanks to an innovative material and a special production process
- + Outstanding product quality thanks to strict quality assurance
- + Particularly resistant to hot and cold temperatures thanks to high-quality ceramic material produced in-house

Exceptional design highlights

- + Impressively precise design with extremely thin walls and sharply defined edges
- + Exceptionally delicate forms offer scope for premium bathroom designs

Collections

- + The following collections are available with washbasins in TitanCeram: Antheus, Artis, Finion, Memento 2.0 (500 and 600 mm surface-mounted washbasins), Octagon (winner of the Good Design Award 2015 and the iF Design Award 2016)
