# Special Finish

**The Polvere di Luna finish makes** cutlery surface look satin-like and delicately brilliant: a smooth surface with contrasting shades. Pleasant and velvety to the touch, the cutlery so treated convey a softness and warmth unusual for steel objects. A sober and unusual coating for contemporary cutlery.

## Polvere di Luna

cod. \*...32

**Moon dust PVD Black**  
cod. \*...39

## Opacity, scratches and marks

intentionally made on the surface of the cutlery with a Vintage finish give the effect of objects that have been used for a long time, of a large, warm and steamy kitchen filled with aromas, of the friendly gatherings of old good times and ancient flavours. They evoke images of traditional, simple environments with no intention to be modern.

## Vintage

# Special Finish

**The PVD (Physical Vapour Deposition)** technique allows to deposit a high-thickness metal film with remarkable characteristics from the decorative and technical point of view. Such process makes the product treated durable in time and gives high surface hardness. The item turns resistant to solvents, acids and to various products used in the kitchen, keeping its chemical/physical characteristics unchanged. It is a thoroughly biocompatible, anallergic treatment and suitable for food contact.
